ERRATUM

The addition of duraplasty to posterior fossa decompression in the surgical treatment of pediatric Chiari malformation Type I: a systematic review and meta-analysis of surgical and performance outcomes

TO THE READERSHIP: An error appeared in the article by Lu et al. (Lu VM, Phan K, Crowley SP, et al: The addition of duraplasty to posterior fossa decompression in the surgical treatment of pediatric Chiari malformation Type I: a systematic review and meta-analysis of surgical and performance outcomes. *J Neurosurg Pediatr* 20:439–449, 2017).

In the *Results* section of the abstract, a p value was incorrectly given as $p = 0.0009$. The correct p value is $p = 0.009$, as shown in the updated sentence below.

PFDD was associated with greater overall clinical improvement ($p = 0.009$), along with longer length of stay ($p < 0.0001$) and more postoperative complications ($p = 0.0001$) compared with PFDO.

The article has been corrected online as of November 10, 2017.
