ERRATUM

Radiation exposure in spine surgery using an image-guided system based on intraoperative cone-beam computed tomography: analysis of 107 consecutive cases

TO THE READERSHIP: An error appeared in the article by Costa et al. (Costa F, Tosi G, Attuati L, et al: Radiation exposure in spine surgery using an image-guided system based on intraoperative cone-beam computed tomography: analysis of 107 consecutive cases. *J Neurosurg Spine* 25:654–659, November 2016).

In the *Results*, the number of patients who underwent 2 intraoperative 3D scans was 98, not 99. The corrected sentence is shown below.

Specifically, 1 scan was performed in 2 cases (in revision surgery as final control); in 98 cases 2 scans were performed (1 for navigation and 1 for final control); and in 7 cases 3 scans were completed.

The article has been corrected online as of January 13, 2017.
