Erratum

Relationship between the ophthalmic artery and the dural ring of the internal carotid artery

TO THE READERSHIP: An error was made during the editorial process in the article by Horiuchi et al. (Horiuchi T, Tanaka Y, Kusano Y, Yako T, Sasaki T, Hongo K: Relationship between the ophthalmic artery and the dural ring of the internal carotid artery. J Neurosurg: published online February 13, 2009; DOI: 10.3171/2008.11.JNS08766).

The legend for Figure 2 was published incorrectly. It should read: “Fig. 2. Case 1. Intraoperative photographs through the pterional approach showing a paraclinoid aneurysm (asterisk in B), dural ring (arrow in A), and a small dilation (arrowhead in B).”

We apologize to the authors and to the readership for this error.

GILLIAN SHASBY
Director of Operations
