ERRATUM

Clinicopathological variables of sporadic schwannomas of peripheral nerve in 291 patients and expression of biologically relevant markers

TO THE READERSHIP: Two errors appeared in the article by Young et al. (Young ED, Ingram D, Metcalf-Doetsch W, et al: Clinicopathological variables of sporadic schwannomas of peripheral nerve in 291 patients and expression of biologically relevant markers. *J Neurosurg* [epub ahead of print September 8, 2017; DOI: 10.3171/2017.2.JNS153004]).

In the list of abbreviations, “HER” was incorrectly defined as “human epidural growth factor receptor-2.” The correct definition is “human epidermal growth factor receptor-2.” In addition, the term “epidural growth factor”

was used twice in the Abstract, where it should have read “epidermal growth factor.” The text has been corrected so that “epidermal” replaces “epidural” in all 3 instances.

In Fig. 1, the label at the top of the graph was missing. It has been restored in the version shown below.

The article has been corrected online as of November 10, 2017.
