ERRATUM

Brain repair by hematopoietic growth factors in the subacute phase of traumatic brain injury

TO THE READERSHIP: An error appeared in the article by Toshkezi et al. (Toshkezi G, Kyle M, Longo SL, et al: Brain repair by hematopoietic growth factors in the subacute phase of traumatic brain injury. *J Neurosurg* 129:1286–1294, 2018).

In the section *Controlled Cortical Impact Model of TBI* in the *Methods*, the contact time was misstated as “85-msec” in the following sentence. The correct contact time is shown below.

A 3-mm flat tip with a strike velocity of 1.5 m/sec, a 2-mm strike depth from the surface of the dura, and an 8.5-sec contact time was used to induce cortical TBI.

The article has been corrected online as of February 15, 2019.
